**THE TECHNOLOGY
INNOVATOR.**

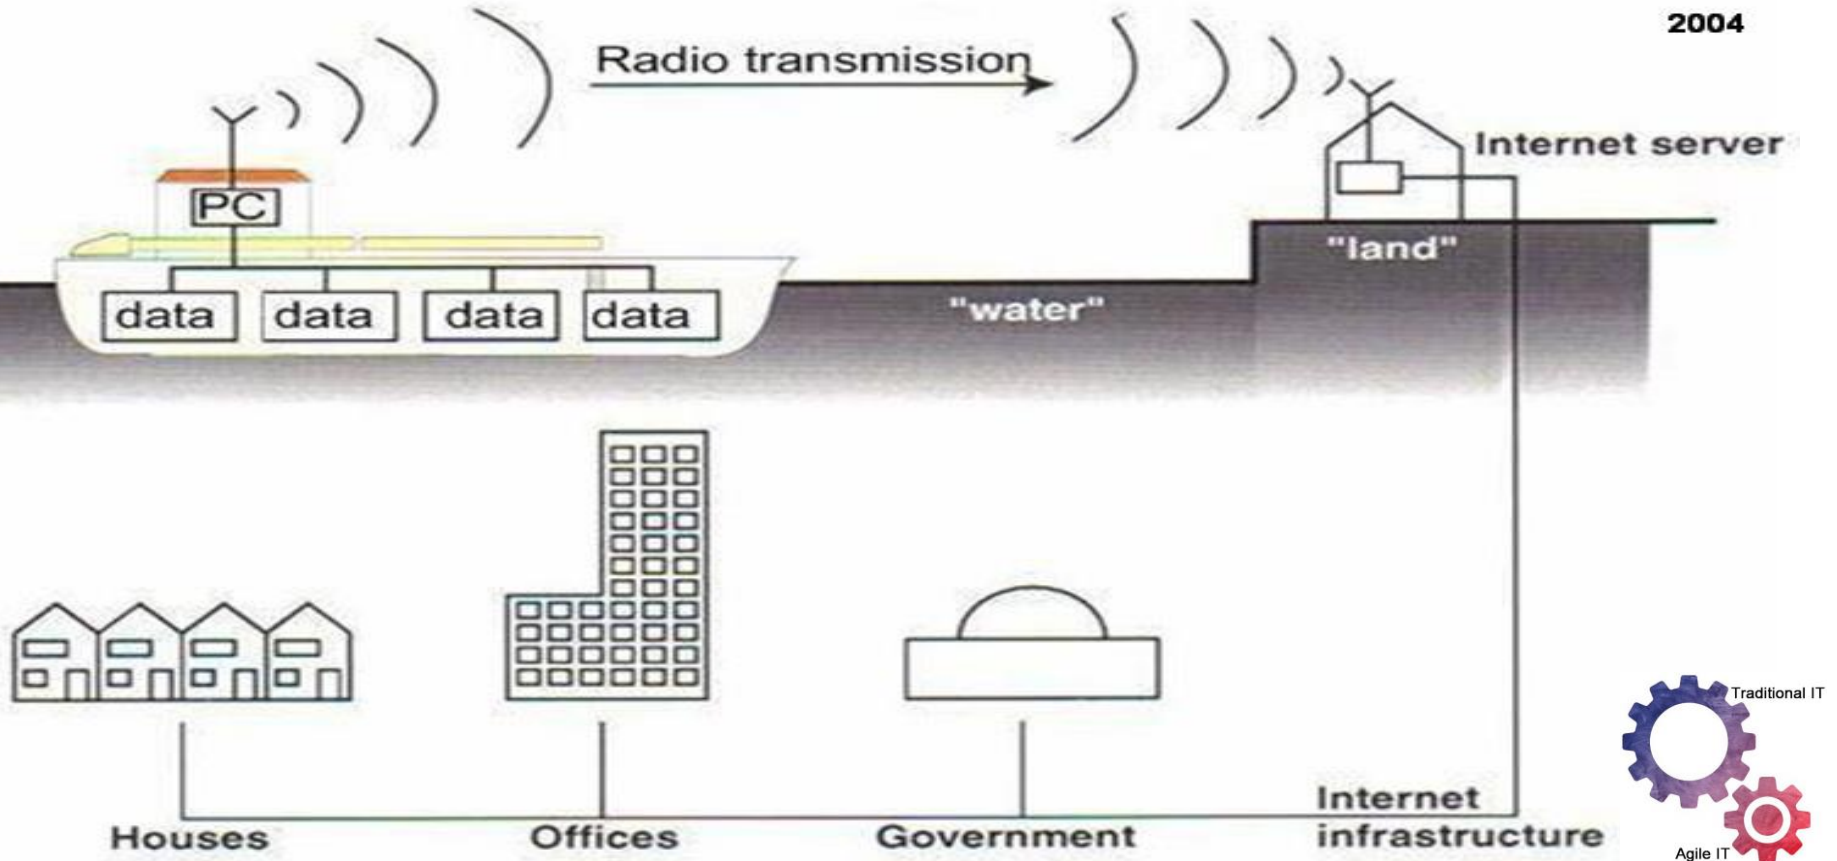

ROYAL**IHC**.COM

IHC SYSTEMS > CONTENTS

- Historical context
- Dredge Monitoring
- Edge Analytics
- DFMS
- True insight
- Conclusions

IHC SYSTEMS > 15 YEARS AGO, A VISION

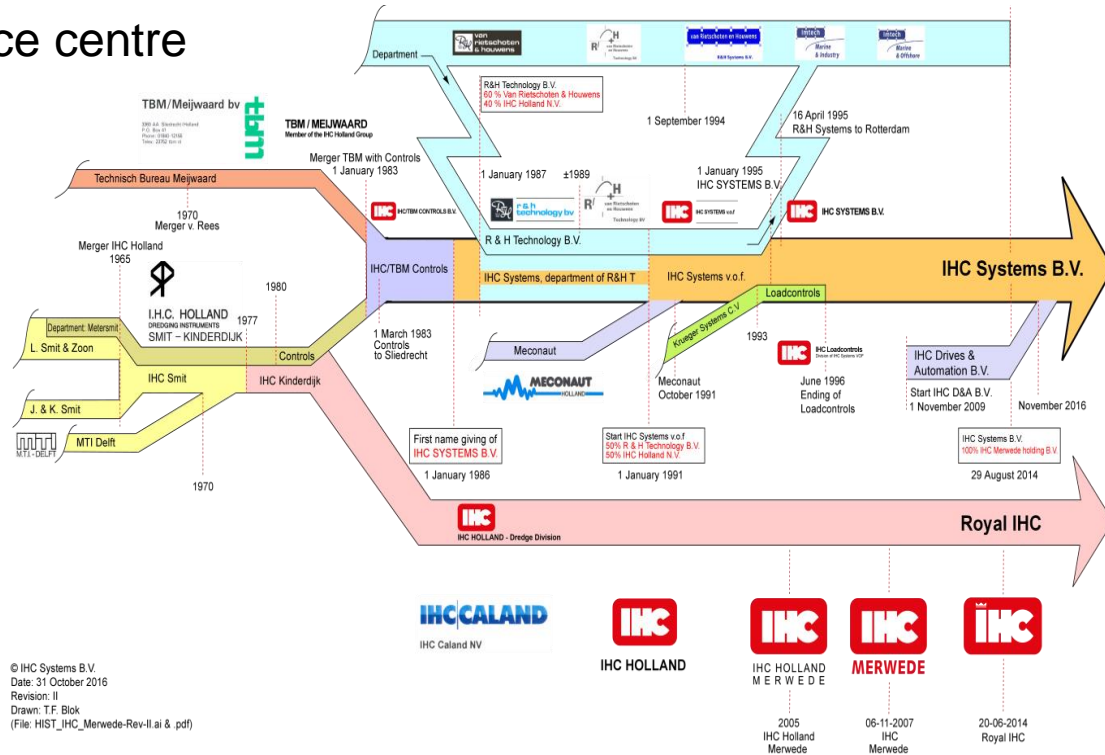

2004

IHC SYSTEMS > COMPETENCES

COMPANY PROFILE & MISSION

- Royal IHC E&A competence centre
- Ca. 200 people @ work

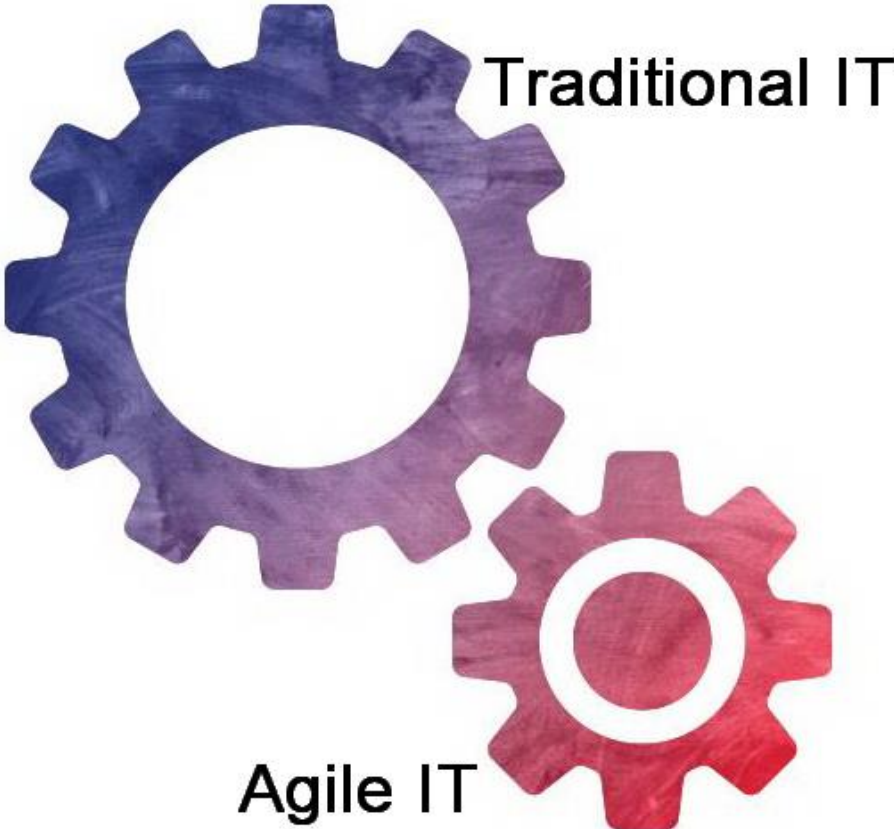

© IHC Systems B.V.
 Date: 31 October 2016
 Revision: II
 Drawn: T.F. Blok
 (File: HIST_IHC_Merwede-Rev.II.ai & .pdf)

IHC SYSTEMS > BIMODAL IT IN DREDGING

- Traditional IT as applied in the control, measurement, monitoring and automation systems on the dredger
- Agile IT where applications are rapidly produced and changed, pending dredging projects etc.

IHC SYSTEMS > THE INVENTION OF THE WHEELS

IHC SYSTEMS > DREDGER LIFECYCLE CHALLENGE

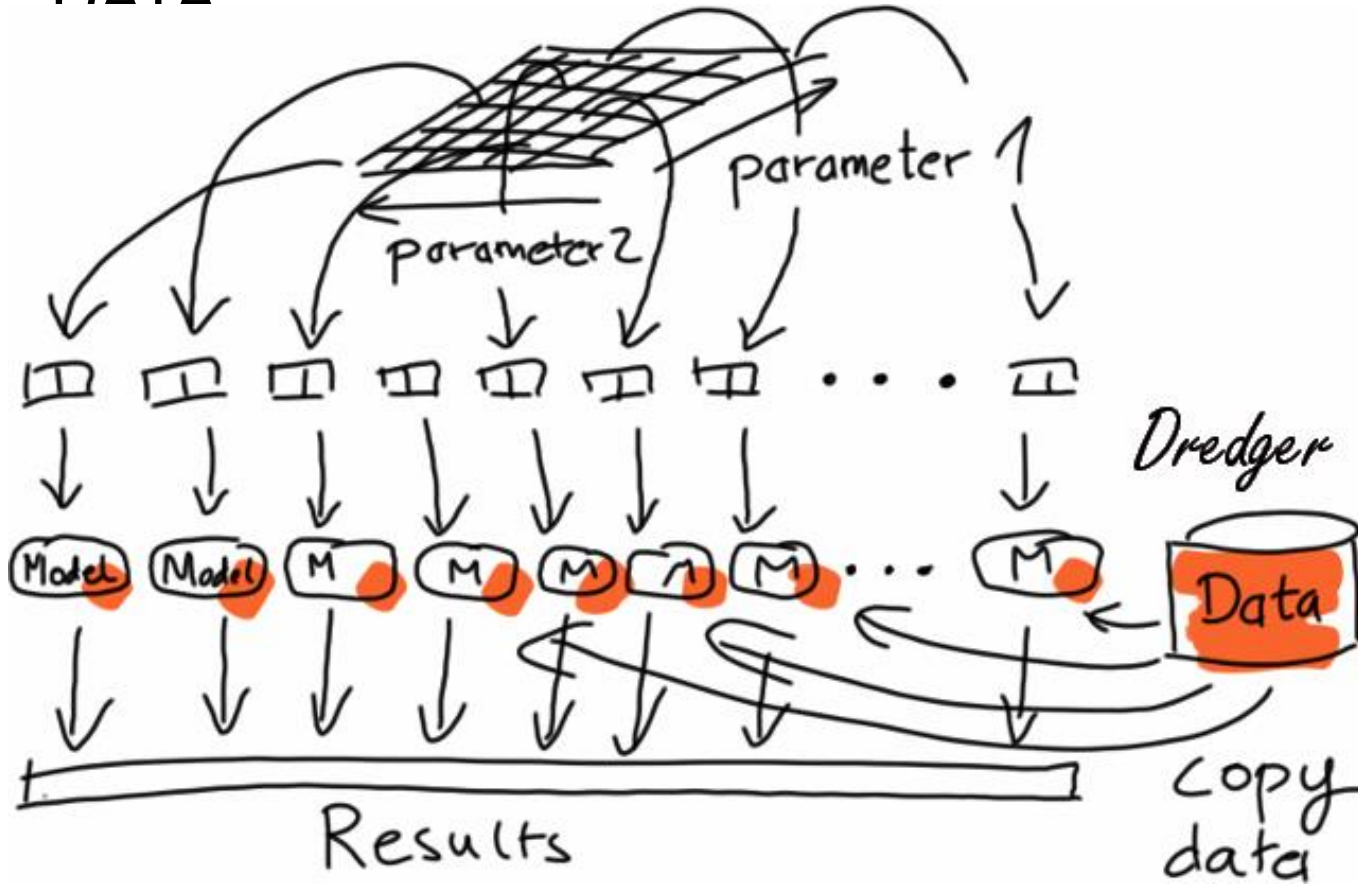

- A dredger for 30 to 50 years (steel hull)
- Traditional IT for 7 to 12 years (Printed Circuit Boards)
- Agile IT for a month to 3 years (software version or App)

IHC SYSTEMS > T.S.H.D. MAGDALEN

IHC SYSTEMS > EDGE ANALYTICS & BIG DATA

IHC SYSTEMS > DATA SHARING LIMITS ?

- Bedrooms
- Earning models, definitely in dredging

IHC SYSTEMS > TO BE OR NOT TO BE

IHC SYSTEMS > INFORMATION FOCUS

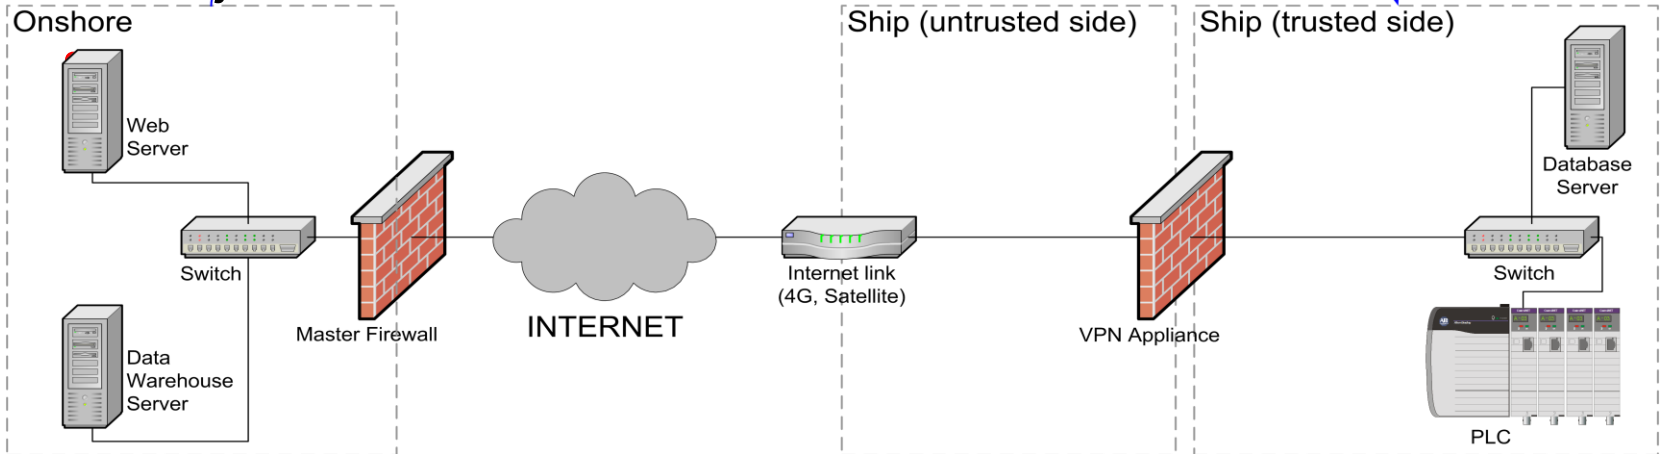

- Safety
- Maintenance
- Operations

IHC SYSTEMS > SECURE BY IHC CONNECT

Access to ship's network over VPN

- Subject

IHC SYSTEMS > BROADBAND WIRELESS ACCES (BWA)

IHC SYSTEMS > BIG DATA ARRIVAL

- Disappearing connection restrains
- Ship data = Shore data
- Usefull... or just nice to have?

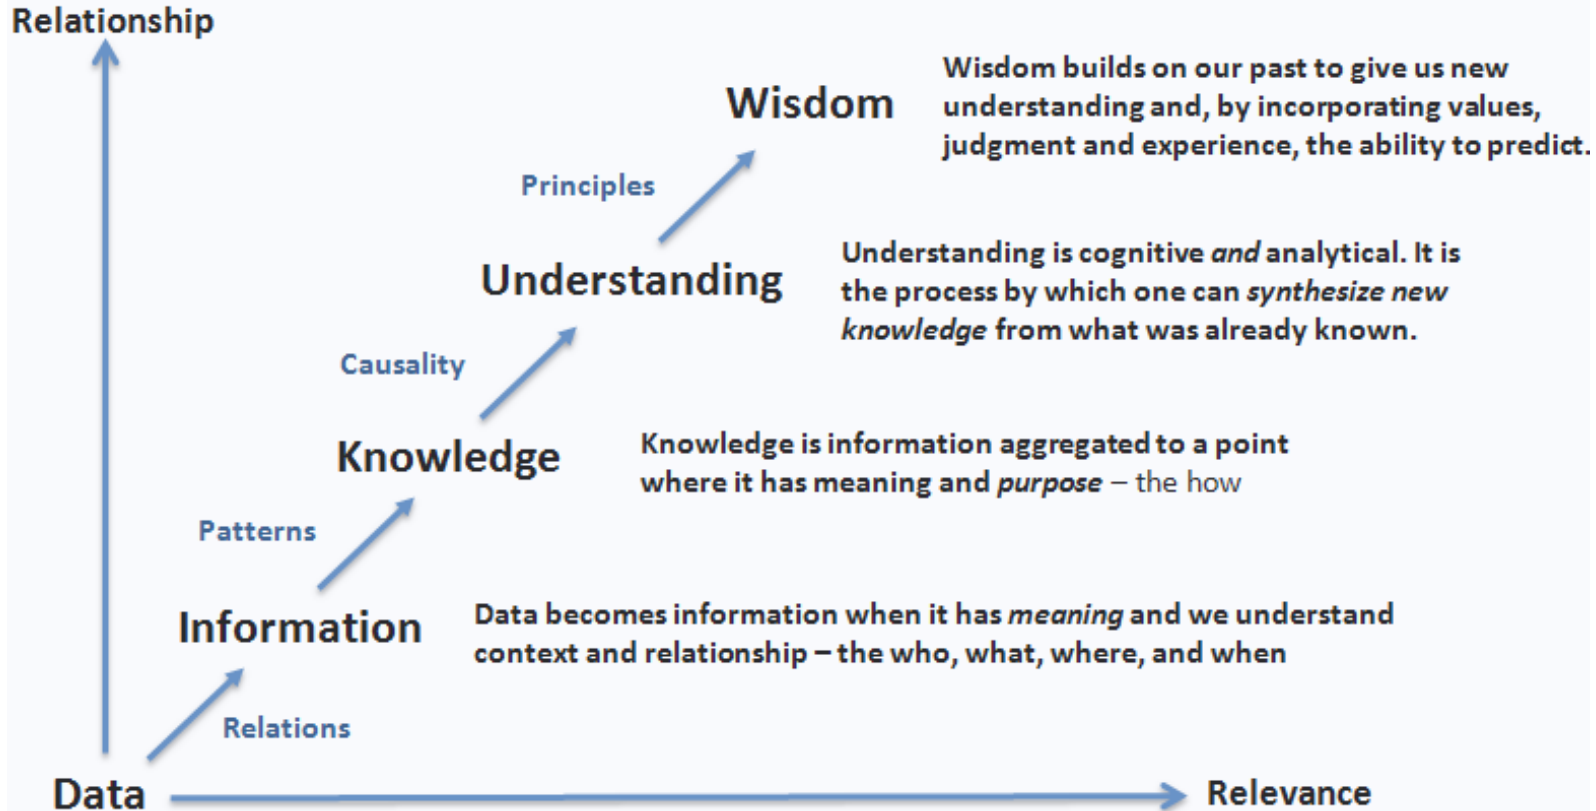

IHC SYSTEMS > THE PITFALL

“The greatest enemy of knowledge is not ignorance,
it is the illusion of knowledge.”

Daniel Borstin, in *The Discoverers* (1983)

IHC SYSTEMS > TRUE INSIGHT

Advancing Beyond Data to True Insight

IHC SYSTEMS > TRIP AND OR DAY REPORT

- Live data
- Production
- Historical data
- Production
- Fuel consumption

Essayons

WGS84 Position:
51° 43' 14.1'' N 4° 23' 16.9'' E

Live data:

Production	1.00	m3/h
TDS	1.23	ton/h

Historical data:

- Production
- Fuel consumption

Reporting:

- Last trip
- Day report

IHC SYSTEMS > DFMS DATA TABLE EXAMPLE

- Custom data set
- User change
- Windows
- Graphics
- Exportable to file
- Trip comparison

DFMS Office CSD Demo 1- Graphs Reports Settings Login

Trip [45] report details Print graph

Project:	C	Trip number:	45
Dredge area:	Sliedrecht	Week number:	17/2016
Dump / Reclamation area:	Rotterdam	Start date:	18-04-2016 12:23
Soil type:	Sand	End date:	18-04-2016 12:29

Operational hours	Delay	Time
Trailing	00:00	03:03
Sailing full	00:00	00:10
Pumping ashore	00:00	02:56
Dumping	00:00	00:00
Sailing empty	00:00	00:08
Total Operational hours	00:00	06:17

Delay time + Delay code	Time
1. On order	00:00
2. Weather & sea state	00:00
3. Tide	00:00
4. Traffic	00:00
5. Positioning system	00:00
6. Diesel engines	00:00
7. General engine room	00:00
8. Deck	00:00
9. Dredge pump	00:00
10. Draghead	00:00
11. Fuel & Watersupply	00:00
12. General maintenance	00:00
13. Obstruction	00:00
14. Mooring/ coupling	00:00
15. Reclamation	00:00
16. Floating pipeline	00:00
17. Others	00:00
18. Spare	00:00
19. Spare	00:00

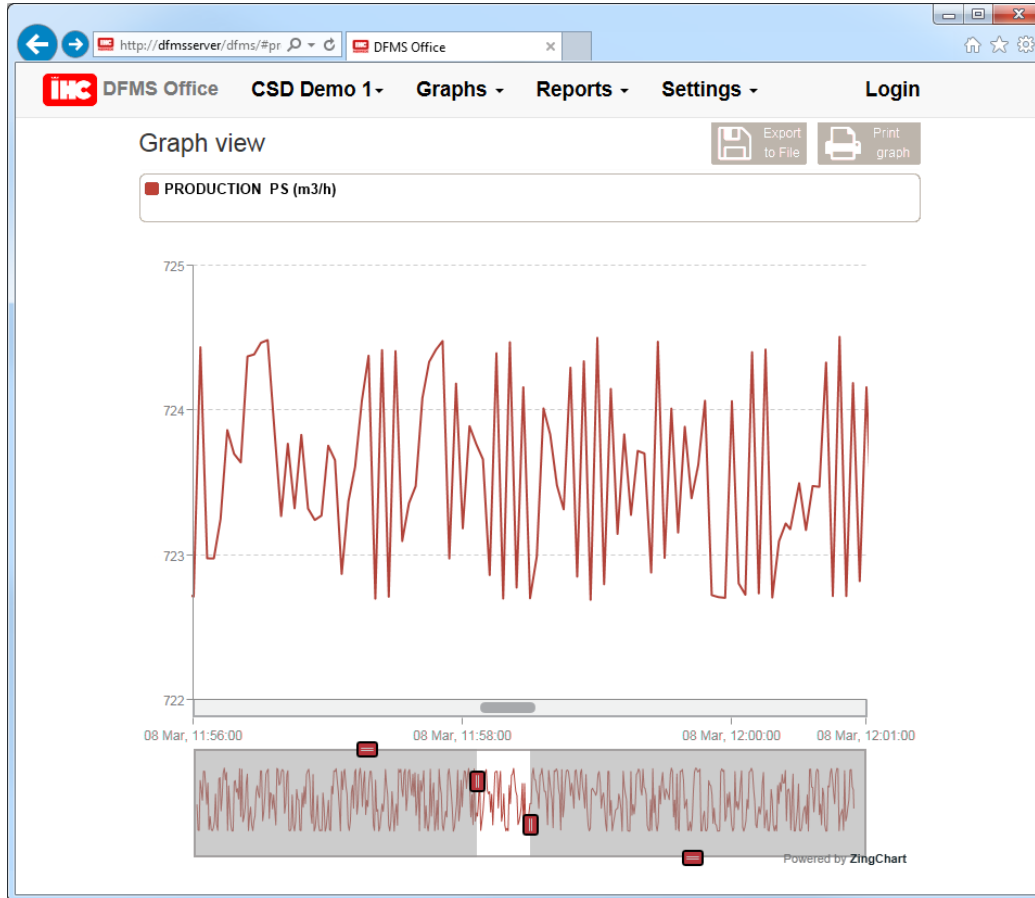

Load at start unloading	EU	Value
Volume load manual sounding	m ³	0
Volume InSitu (sand in Hopper)	m ³	6297
Density InSitu (sand)	t/m ³	2100.00
Weight load	tons	13224
Weight TDS	tons	15690
Density TDS	t/m ³	2600.00
End position overflow	m ³	0
Volume load by sensors	m ³	0

Loading average	EU	PS	SB
Pump capacity	m ³ /s	10.7	0.0
Mixture density	t/m ³	1.10	1.00
Pump speed	rpm	-0	
Suction production	m ³ /hr	2685	0
Load production	m ³ /hr	7241	7241
Dredging depth	m	10.5	7.2
Cutting depth	cm	282.0	-297.9
Vacuum	bar	0.60	0.62
Pressure swell compensator	bar	34	77
Jet pressure	bar	0.0	0.0
Trailing speed	knots		0.0

Sailing	EU	Value
Speed sailing full	knots	0.0
Distance sailing full	nm	0.0
Speed sailing empty	knots	0.0
Distance sailing empty	nm	0.0

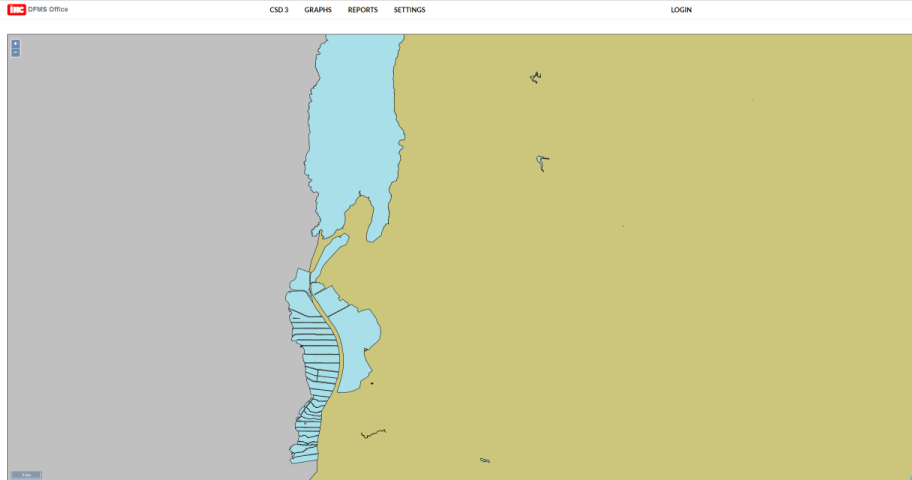

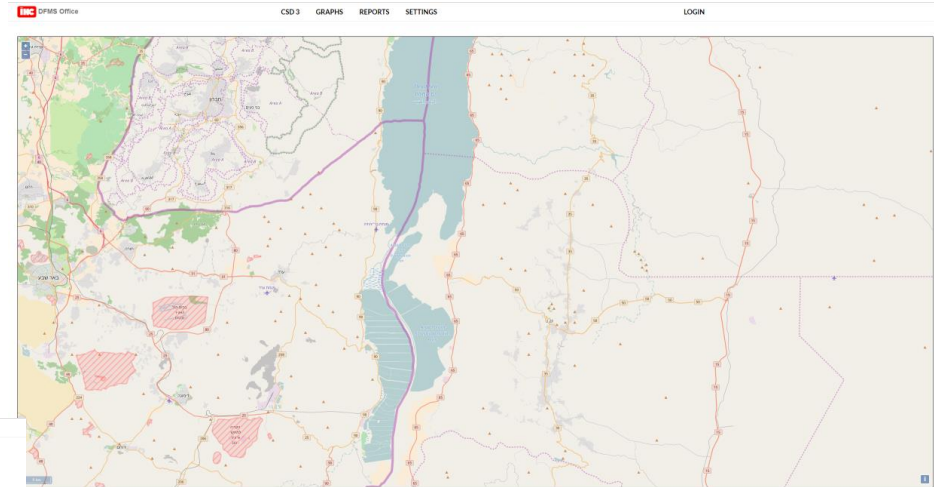

IHC SYSTEMS > DFMS GRAPH EXAMPLE

IHC SYSTEMS > OPEN STREET MAP

- Open street map
- Fall back map

IHC SYSTEMS > CONCLUSION

- The dredger is in 2017 part of the internet of things
- Development in Industry 4.0
- An autonomous machine, monitored over the internet

IHC SYSTEMS > LOOKING FORWARD

- Development in Industry 4.0
- A dredger monitored over the internet
- An autonomous dredger monitored over the internet
- An autonomous machine controlled over the internet

IHC SYSTEMS > APP

- Each dredger will get his App
- Acces for all stakeholders?

Q & A?
